

SiteScape Zon

The Instant Collaboration Platform

Web conferencing saves time and money and improves productivity by enabling people to brainstorm, give presentations, share documents and applications, conduct training and more — all without leaving their desks. That means faster decisions, shorter cycle times, better communication, and reduced travel expense.

Not all web conferencing products are created equal, however. Some are effective for conducting scheduled meetings. But the scheduling process still takes significant time and effort; sometimes more than the meeting itself. For those who need to collaborate frequently or on an impromptu basis, scheduled-only solutions are impractical.

SiteScape Zon eliminates scheduling hassles and goes a giant step further. Zon integrates web and teleconferencing, instant messaging, presence/availability detection and contact management in one best-of-breed solution.

The immediacy of Zon will encourage and enhance collaboration throughout your organization. Now meetings can take place wherever and whenever the need arises; not just on a schedule. With one mouse-click any group of available people can be simultaneously called on the phone and placed into a teleconference or web conference. No more wasting an hour setting up a quick discussion -- collaborate *now* from your desk.

Zon is as easy to support as it is to use. Just click a URL and the micro-thin Zon client downloads and runs in seconds, with no installation or maintenance necessary. Zon even gathers contact and directory data automatically, with no importing or syncing required.

Benefits

WhoZon?

With Zon's unique presence capabilities, you'll always know who's online or on the phone before starting an instant meeting.

Greater productivity.

Spend less time traveling and less time scheduling meetings. Zon offers instant access to the people and resources you need, when you need them. Find colleagues, see who's available, and meet — all with a click of your mouse.

Complete and convenient.

Seamlessly integrates web conferencing, teleconferencing, presence detection, instant messaging and contact management, all in one handy place.

Robust security.

Resides behind your firewall, so your data is not exposed over external networks or servers.

Hands-off administration.

"No-touch" client install. No need to import contact or directory data. Flexible system policies provide full access control.

Lower total cost.

No per-minute fees, easy administration and straightforward integration with existing systems equal rapid ROI and ongoing savings over pay-per-use alternatives.

Full Integration

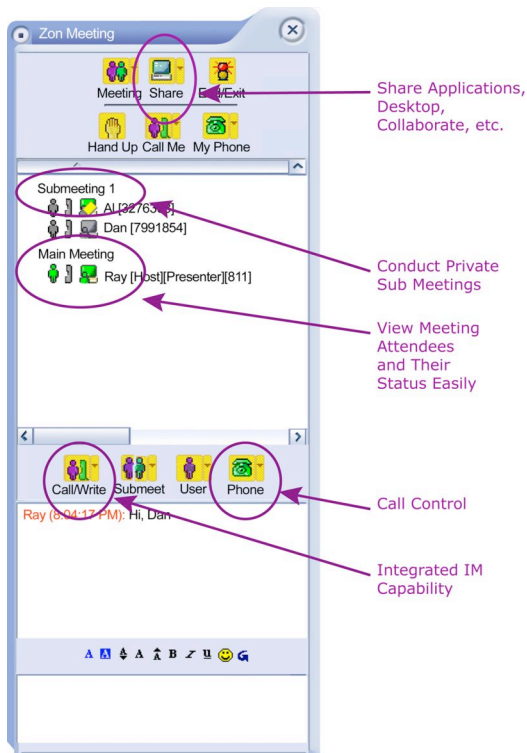

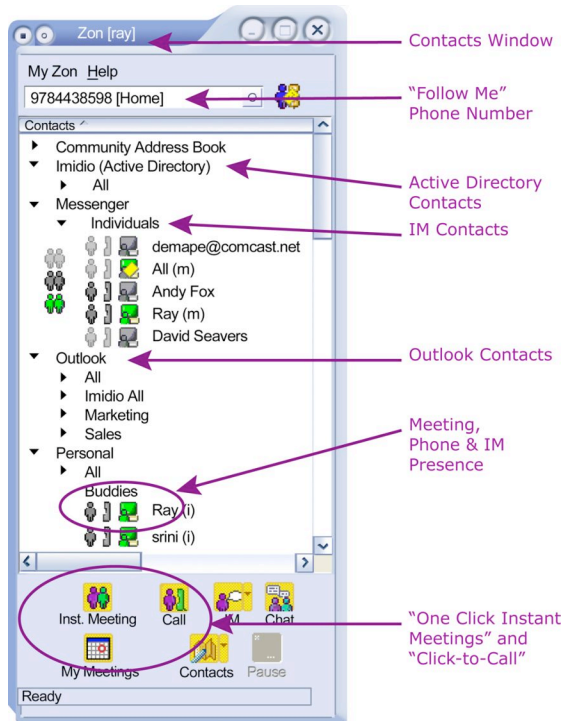

- Instant, integrated access to web conferencing, teleconferencing, application sharing, IM, chat and click-to-call.
- Co-exists on the desktop with AOL, Yahoo or MSN instant messaging — no IM compatibility worries.
- Integrates easily with existing voice and data networks, corporate address books and Microsoft Outlook/Exchange.

Contact Management

Zon automatically collects contact information enterprise-wide, from IM systems, e-mail servers, corporate directories and contact management systems — no importing or synchronization necessary. Just click on contacts to initiate a conference or share your PC!

Presence Management

- Know instantly who is available, on the phone, or already in a conference before starting an impromptu meeting.
- Contact participants automatically via their preferred method (IM, e-mail, various phones or any combination), reducing phone tag and interruptions.
- "Follow-me phone" keeps mobile workers in touch.
- Click-to-call anyone in your IM contact list or Exchange address book. Saves looking up phone numbers.
- Invite new teleconference participants with one-click ease — no more dialing 800 numbers.

Meeting Management

- Conveniently monitor who is present or invited but absent, who is speaking, and participants' roles.
- In-meeting IM lets you ask questions without interrupting.
- Invite/un-invite participants or break for a private sub-meeting with ease at any point.
- Host can change meeting roles (host, moderator, presenter, participant) anytime.
- Define "reusable meetings" you can start with one click.

Application Sharing

Deliver presentations, display documents, view websites, share desktops, etc. No waiting to upload documents to a server. Share and pass control; text chat with selective whisper; toggle full/split screen; PowerPoint animation support, interactive whiteboard with saved annotations, and much more.

Robust Security

- Resides behind your firewall.
- Unique meeting IDs, user IDs and passwords.
- Meetings can be public, private or unlisted.

Simple Administration

- No per-minute fees
- Straightforward deployment and low-maintenance operation.
- No-touch client install and no client compatibility worries.
- No need to import/export or synch contact data or passwords.
- Configure policies to control nearly every Zon feature.

About SiteScape

SiteScape provides collaborative solutions that specifically address the communication and program management needs of large and/or distributed teams in business and government. Our solutions offer low cost of ownership and unbeatable ROI.

System Requirements
