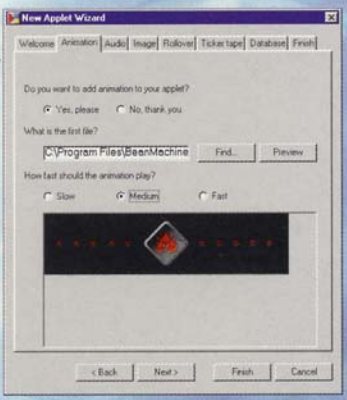
INTRODUCING LOTUS BEANMACHINE FOR JAVA—THE MOST EXCITING AND EASY-TO-USE TOOL FOR BRINGING JAVA-BASED LIFE INTO YOUR WEB UNIVERSE.

THE LATEST GENERATION OF WEB LIFE IS HERE

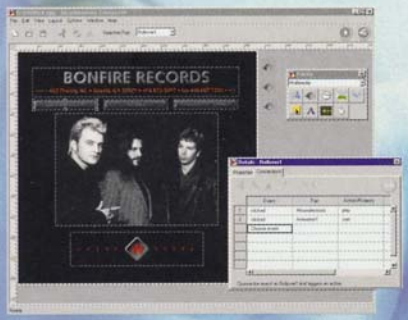
You already know Java™ is the hottest and most powerful way to add new life—multimedia, special effects like tickertapes and nervous text, intelligent forms and live data—to your Web site. And now you can do it without writing a single line of code! Lotus BeanMachine™ for Java makes the entire process incredibly fast and easy. It even publishes your applet to your site, complete with HTML and media.

BeanMachine is an interactive visual authoring tool for combining Java and JavaBeans™ components into new intranet and Internet applications. Just choose a bean, set its properties and connections and "It's Alive!" Specifically designed to give content authors, designers and Webmasters 100% Java without the grind, BeanMachine is the perfect complement to the latest generation of Web site creation tools.

Tailor the characteristics of your JavaBeans—create from a variety of options.



Simply click a button to add media and animation to your Web site.



With the BeanMachine Composer you can add logic and interactivity to bring your JavaBeans to life!

"...I created my first ever applet in about 10 minutes."

Bob Rogers,
MIS, Pratt & Whitney

"...I can see this fine product becoming the defacto standard for Java publishing..."

Robert Lehman,
Technology Coordinator,
Low Associates

AND WHY NOT KEEP EVOLVING?

DOWNLOAD BeanMachine today (www.lotus.com/devtools) and see firsthand how visual Java authoring can enliven your Web presence. And to keep your site evolving, check out some of the other Web-centric development tools from Lotus. Nobody gives you more ways to transform static Web content into a dynamic electronic storefront than we do. Start with Lotus Domino™ and Domino.Action,™ the world's leading Internet/intranet development platform. Take off from there with sophisticated tools like:

LotusScript,® a cross-platform, object-oriented, embedded BASIC scripting language for building powerful Web applications that are tightly integrated with Domino.

Notes Global Designer,™ a breakthrough productivity tool that can make your Domino-based applications multilingual, quickly and cost-effectively.

So let your Web site evolve to the highest level—with extensible business solutions for everything from on-line shopping to home banking to customer support. Lotus Web Developer Tools enable you to connect the applications and dynamic data sources you're using today, and extend them to the people who need them; your employees, partners, customers, or anybody with a Web browser. Add the latest generation of cost-effective, interactive Web-based business applications now, with Lotus technology.

Explore www.lotus.com/devtools for the latest on these exciting new tools.
